

Rheumatology Referral Request

Referral In Phone: 870.264.2433
Referral In Fax: 479.271.7764

All referrals require a minimum of complete Demographics, Order with applicable diagnosis, Office/Visit Note(s), and any Insurance Requirements faxed to 479-271-7764. Thank you so much!

_____ Demographics including Insurance Information

_____ Order with Applicable Diagnosis

_____ Office/Visit Note(s) regarding the Diagnosis

_____ Insurance Requirements (if plan requires additional authorizations)

So that we may better serve our referring physicians and identify the most acute patients, we kindly request, but do not require, the following lab results be included in Rheumatology consultation requests:

- Complete Blood Count (CBC)
- Comprehensive Metabolic Panel (CMP)
- Erythrocyte Sedimentation Rate (ESR)
- Rheumatoid Factor (RF)
- Anti-Cyclic Citrullinated Peptide (CCP)
- C-Reactive Protein (CRP)
- Antinuclear Antibodies with Reflex Titer (ANA) (= or >1:320 for primary diagnosis)

If the above labs are unremarkable but the patient is felt to have an underlying autoimmune process despite normal labs, please have the referring physician contact our rheumatologist via email.

Please know that our clinic is not able to perform disability evaluations or functional capacity examinations.
